3/5/08

Sirs;

I have received a letter from your office approving the reclamation plan for a mine, Carnotite West that I am in the process of bringing into production, case # S/015/0097. I need to amend the dimensions of the surface affected area. The reclamation plan and the associated map detailed a 5 acre area 425' X 500' which is 212,500sq. ft. The amended area should be corrected to be 300' X 700' which is 210,000sq. ft. and is somewhat less than 5 acres. The surface affected has been marked on site by with 4 steel fence poles, one at each corner of the affected area. The fence poles have yellow and blue surveyors tape attached. Please make this change to my reclamation plan. Also my reclamation surety bond has not yet been approved, when it comes in I will FAX it to your office without delay. Should the bond be not approved, I will use one of the alternate plans and put the \$18,600 in deposit as required.

Thank You,

Ted Thompson
